Plan for Semester 2:

Idea 1:

- We will Transform the Current Platform into a fully safety Management Platform.
- Build a System that: Tracks safety compliance over time, provides analytics dashboards, sends alerts and generates reports.
- Platform Contains:
    1. Role-based authentication: Admin, Supervisor, Viewer.
    2. Alert System: SMS/email/notification alerts when violations occur.
    3. Safety Dashboard.
    4. Generate a small Documentation about Project 1 (Last Semester) for Marketing and Business.
    5. Reporting: Weekly Report about Incidents that happened in the last week.
    6. Gloves AI Model.
    7. Vest AI Model.
    8. Googles AI Model.
    9. Face Guard Mask Model (Optional).
    10. Shoes Model (Optional).
    11. Safety Suit Model (Optional).
    12. Extra We could do research on Hard Components if Possible and if there is time like GPS on Helmet (Tracker).
